

HORIZONTAL DESIGN-BUILD: MODOT

The Road to Saving Lives Design Build Project

Please join the Design-Build Institute of America St. Louis Chapter (DBIA- STL) for our breakfast program welcoming Stephen Georges with MoDOT, James Ritter with Jacobs Engineering and Jarrett Jasper with Horner + Shifrin for a presentation and discussion on the MODOT The Road to Saving Lives Safety Design Build project.

Learn how MODOT has earned national attention for this unique Design-Build project that combined 31 different focal areas procured with a stated budget and prescriptive design requirements resulting in the completion of the design and construction of the work in under 18 months.

Join us to learn how DBIA-STL can help you and your company representing the industry and advocating for alternative project delivery methods regionally and nationwide. Our members and frequent attendees include a diverse group including owners, developers, design professionals, contractors, suppliers, educators, municipalities, and students.
