

National Certification Workshop

in St. Louis

The DBIA Mid-America Region is proud to offer an all-inclusive National DBIA Certification Workshop in the Midwest. This three-day intensive program includes three of DBIA's four core courses required for certification and gives participants access to the online Fundamentals of Project Delivery (remaining core course) and exam prep course.

- Day 1:** Principles of Design-Build Project Delivery
- Day 2:** Post-Award Design-Build
- Day 3:** Design-Build Contracts and Risk Management

National Certification Workshop

in St. Louis

Schedule

DAY 1: PRINCIPLES OF DESIGN-BUILD PROJECT DELIVERY

Addresses the use of design-build as a project delivery method, focusing on essential concepts and characteristics, as well as critical elements of the RFQ/RFP process and overall project management. It is an interactive, problem-solving course where students can take part in a structured team-learning environment.

Instructor: Dan Rawlins

DAY 2: POST-AWARD DESIGN-BUILD

A must for anyone who has taken DBIA's core courses and is ready to move on to a clear understanding of managing the design-build process. It will provide an overview of the construction and design-build contract management processes that are important as the construction phase ramps up. Attendees will discuss typical project schedules and possible risk areas and ways to avoid delays. Instructors will discuss the design / construction interface and the responsibilities of each party (designer, builder, contract manager, user) in a design-build contract. In addition, the course includes a basic overview of the commissioning, testing and turnover phase of work.

Instructor: Dan Rawlins

DAY 3: DESIGN-BUILD CONTRACTS AND RISK MANAGEMENT

Focuses on applying effective contracting language, as well as insurance, bonding and surety products and strategies to successful design-build project delivery. Key issues relevant to public and private sector owners and design-build entity teams are addressed, making this seminar a must for anyone utilizing integrated project delivery. The course emphasizes providing relevant legal, contracting, insurance and risk management knowledge with strategies for applying this knowledge to the evaluation of your existing risk mitigation measures.

Instructor: Bill Reifsteck
