

Alvine HQ Mixed-use Building Tour & Happy Hour

This new mixed-use facility offers residential, office, retail, and parking. Design challenges were presented by significant site constraints including underground district energy systems, overhead high voltage distribution lines, and a railroad transit line.

The [WELL Building Standard®](#) is a performance-based system for measuring and certifying elements of buildings that impact human health and well-being. [Alvine Engineering](#) has developed an expertise with the rating system by working with several clients to understand the standards, features, and where their spaces fall within the rating spectrum. Alvine reinforced this experience and embraced the WELL Building Standard by designing their new corporate headquarters to be one of two buildings in Nebraska seeking WELL-certification for the tenant improvement space of 1207 Cass Street.

THE ESSENTIALS

Date: Wednesday, September 26th, 2018

Time: Tour: 4:00pm
