

March Program

Driving Value for Health Systems Through Design-Build

25 years ago, design-build was considered a radical, alternative delivery method. Now it is one of the most popular and fastest growing project delivery methods.

Locally, Karen Shumate, the COO of LMH Health, is utilizing design-build to the fullest extent in building a new hospital. On March 27, come hear from Karen and the project team as they share their experiences, lessons learned and thoughts on why design-build was the best delivery method for this project.

We would love to hear what topics and questions are important to the audience. If you have any, please email them to Jesse Dull at jdull@mccowngordon.com. A live Q/A session will still be available.
