

# Controlling Risk on Commercial Projects Through Civil Design-Build

This program explores the benefits of utilizing a civil design-build partner early in project conception to assist with risk mitigation and project cost certainty, especially in urban settings where existing infrastructure unknowns are an elevated risk.

Castle Contracting will describe how they developed this new approach as an improvement over traditional design-bid-build civil work with related case studies, and bring awareness to the value of early design-build engagement of civil expertise.

## THE ESSENTIALS

**Date:** November 18, 2020  
**Time:** 7:30-9:00 AM (Breakfast Included)

**Location:** The Engineering Center of St. Louis  
 (Engineer's Club) 4359 Lindell • St. Louis, MO

*Or Virtual –  
 Link to Virtual Presentation option provided with registration*

## EVENT SPONSOR

**COST** Members & Guest: Free  
 Both In Person or Virtual

**QUESTIONS?** Scott Schroer  
[scott.schroer@siemens.com](mailto:scott.schroer@siemens.com)

**REGISTER** <https://dbia-stl-nov-program-20.eventbrite.com>
