

The Human Side of Collaboration – FMI (Hybrid)

**Up to 60 seats in-person or unlimited live-stream option. Due to COVID-19 constraints, registration must occur by 10am April 22, 2021.*

Gregg Schoppman, Principal, FMI: We are inundated with the concept of strong teams and effective collaboration. However, these two concepts are not always unified. We want our teams of construction A-E-C professionals, owners, end-users to collaborate and push for the same goals. Is it a pipe dream to wish for something that pits individual teams that are diametrically opposed to truly collaborate? How can a group of individuals and teams collaborate regardless of the delivery method to achieve win-win results.

Learning Objectives: • Discover the inhibitors of internal and external collaboration and examine the root causes of failure • Identify the core elements of team success • Identify and discover the process, tools, and metrics that enable successful collaboration from happening • Engage in a workshop to bridge across firms, business units, projects, and individuals to illustrate the power of high performing teams.
