

KCI Airport New Terminal Project Update

At just over one million square feet and \$1.5 billion, the Kansas City International Airport New Terminal Project is the largest single infrastructure project in the City's history. Completion is scheduled for early 2023 with 39 gates, a 6,100-space parking structure, and landside and airside civil improvements. The New Terminal will support more efficient airline operations while allowing passengers the opportunity to enjoy modern air travel in a facility with updated technology, inclusive amenities, close parking, spacious gates areas, and ample local food and beverage options.

A leader in the development, financing, and operations of public buildings, infrastructure, and commercial real estate, Edgemoor Infrastructure & Real Estate has delivered or has under construction approximately \$4 billion of public-private partnerships nationally. Clark | Weitz | Clarkson (CWC) is a joint venture of Clark Construction Group, The Weitz Company, and local heavy civil contractor, Clarkson Construction Company. CWC is a member of the greater Edgemoor Team and responsible for leading the design-build efforts on the KCI New Terminal Project. Combined, the team boasts more than 400 years of construction experience. Follow the project's progress at @BuildKCI and @KCIEdgemoor.

— A JOINT VENTURE —

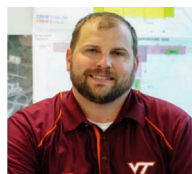

Speakers

Ginny Dobesh, Development Manager
Edgemoor Infrastructure & Real Estate

Ginny has over 15 years of development and real estate finance project management experience. She has been involved in the KCI New Terminal Project for nearly four years where her role involves managing and supporting communication between the project owner and the design-build team.

Pete Thomsen, Senior Superintendent
Clark | Weitz | Clarkson

Pete started with Clark Construction Group's preconstruction department in 2008. During his time with Clark, he has worked in project management, field supervision, and currently as a senior superintendent on the KCI New Terminal Project where he oversees work on the departures level and the building's exterior skin.
