

Implementing Integrated IT, AV, & Security Solutions:

Through the use of integrated systems and common communications platforms, we can design-build buildings that are:

- SMARTER
- GREENER
- LESS EXPENSIVE

Learning Objectives:

- Understand the best point in the design-build process to define the security and technology requirements for a project.
- Learn how integrating technology and security systems design into the overall building design-build process can produce much better outcomes.
- Learn what owners and occupants expect to be available in a modern facility.
- Understand how we can design-build our facilities with the future of technology in mind.

THE ESSENTIALS

October 12th
 8:00am Networking
 8:30 – 9:30am Presentation
 McCownGordon
 255 N Mead St Suite 200,
 Wichita, KS 67202
